DVB-T2 standard Main features of the DVB-T2 mode are 256 QAM with rotated constellations, SISO and MISO support, FEF management, fully autonomous signal acquisition including automatic L1 signaling parsing, 600 kHz acquisition range, support for all pilot patterns, and DVB-T/T2 auto-detection The DVB-T ...

TV HUNTER (DVB-T/T2) - PROMAX

For the DVB-T2 signal, the equipment is able to detect the layers (PLP) that form the transport stream (TS) for data transmission. Each TS may have multiple layers and each layer is identified by a number between 0 and 255. These layers do not necessarily have to be ordered sequentially, so during detection may appear not in order.
